SAINTS BOT
#4688

SPONSOR PACKAGE

2025-2026 Saints Bot #4688 Sponsor Information Package

Greetings,

This is our tenth year as a robotics team at St. Anne Catholic High School and we are happy to boast a team of 30+ students interested in competing in the *FIRST*® Robotics Competition (FRC) this year. These FRC events will be held between February and April 2025. *FIRST* Robotics' global vision is designed to help students recognize and apply problem-solving skills in the real world. *FIRST* (For Inspiration and Recognition of Science and Technology) is a non-profit organization that uses STEAM (Science, Technology, Engineering, Arts, and Mathematics) to help build confidence, create friendships, and gain valuable knowledge that lasts a lifetime. For more information, please refer to www.firstinspires.org.

Our mentors are committed to their mission of inspiring young people to become our world's future leaders. As an extracurricular activity our goals include:

- Inspiring innovation and a well-rounded environment to promote self-confidence, communication, organization, and leadership skills.
- Educating students in the career fields of business, engineering, technology, mathematics, and computer programming.
- Establishing a mentorship program that will enhance parental involvement in our school.
- Creating a program that will assist in building a lasting relationship within our school and community.
- Achieving sustained student interest in related technology, math, business, arts, and science programs.

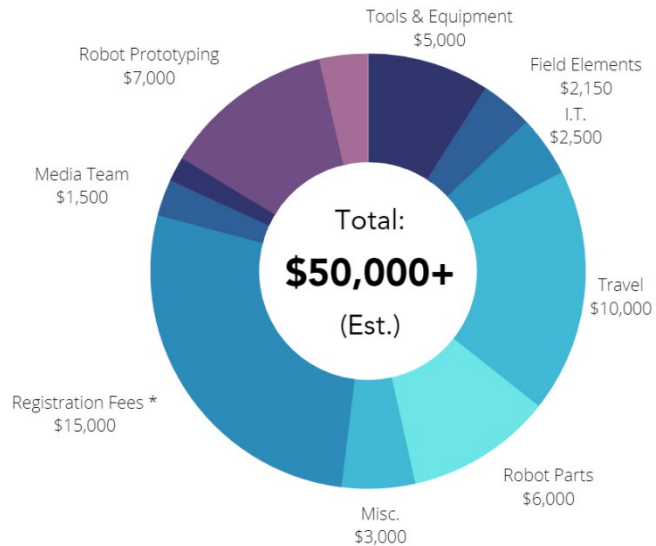

Valued sponsorship support from previous years helped Saints Bot #4688 achieve the following:

- **REGISTRATION (\$9,000+)** in *FIRST* Competitions at the University of Windsor (2015-2025), Durham College (2017), Western University (2018 **WINNER**), Georgian College (2019 & 2024) as well as the Ontario Provincial Championship (2018, 2019, 2023, 2024, & 2025).
- **INCREASED** the diversity of students in our program, sustaining a steady 25+ student involvement.
- **INCREASED** our adult mentor volunteers to 20+ from a variety of industry backgrounds.

Our Budget

Our budget for this year varies greatly on the amount of support received from sponsors, fundraisers, etc.

The chart to the right is our typical annual budget, which allows us to complete the season in full as well as continue to develop and grow the team and its resources year over year. As stated below the chart, the budget may change as the season develops and we determine if certain aspects of the season are possible or not.

This budget is not final and is subject to modification based on available funding for the team, number of sponsorships/donations received, number of people travelling, etc.

Thank You!

We would appreciate your support in helping us to strengthen our robotics program with involvement in *FIRST* and continuing to inspire our students to learn and expand on important skills beyond the high school curriculum. These students are our future employees and leaders. Connecting your brand with them early in their educational development is a good investment in your future technical and business recruiting efforts.

If you can help us, you will find the incentives for sponsorships listed on the next page of this package.

On behalf of Saints Bot #4688, we thank you for your support and consideration.
